Definition and Role of Management

Definition:

Management is the process of planning, organizing, directing, and controlling the activities of an organization to achieve its goals and objectives.

Role:

Management is responsible for ensuring that resources are used efficiently, that employees are motivated and productive, and that the organization is moving in the right direction.

Functions of Managers

Planning:

Deciding on goals and objectives, and determining the best way to achieve them.

Organizing:

Arranging resources and responsibilities to carry out plans.

Directing:

Guiding and supervising employees to ensure that they are working effectively.

Controlling:

Monitoring performance and taking corrective action when necessary.

Levels of Management and Required Skills

Top Level:

Chief executive officer, president, and board of directors. Requires strategic thinking, leadership, and decision-making skills.

Middle Level:

Department heads and managers. Requires analytical, communication, and interpersonal skills.

First Level:

Supervisors and front-line managers. Requires technical knowledge, problem-solving, and communication skills.

Organizational Hierarchy

Definition:

A hierarchical structure in which each level has a specific role and set of responsibilities.

Importance:

Provides clarity and direction, promotes accountability, and facilitates communication and coordination.

Social and Ethical Responsibilities of Management

Arguments for Social Responsibility:

Businesses have a responsibility to contribute to society, improve the quality of life, and support social causes.

Arguments Against Social Responsibility:

Businesses should focus on maximizing profits, and social responsibility can distract from this goal.

Social Stakeholders:

Includes customers, employees, shareholders, communities, and the environment.

Measuring Social Responsiveness:

Can be measured through surveys, social impact assessments, and stakeholder feedback.

Managerial Ethics

Definition:

The application of ethical principles and values to management decisions and behavior.

Role:

Promotes trust, fairness, and integrity, and helps to avoid legal and reputational risks.

Omnipotent and Symbolic View of Management

Omnipotent View:

Management has complete control over the organization and its outcomes.

Symbolic View:

Management serves as a symbol or representation of the organization's values and culture.

Organizational Culture

Definition:

The shared values, beliefs, and practices of an organization.

Characteristics:

Includes norms, language, rituals, and artifacts.

Importance:

Promotes consistency, coordination, and commitment, and helps to attract and retain employees.

Environmental Factors in Global Business

Political:

Includes laws, regulations, and government policies.

Legal:

Includes international trade agreements, intellectual property rights, and labor laws.

Economic:

Includes exchange rates, inflation, and economic growth.

Cultural:

Includes language, customs, and social norms.

International Organizational Structures and Techniques

Structures:

Includes functional, divisional, and matrix structures.

Techniques:

Includes standardization, adaptation, and hybrid approaches.
